

It All Starts Here

Every recording starts at the microphone. Every engineer knows that tone lives or dies at the source.

The M-Series from Applied Research & Technology (ART) defines the next generation of high performance microphones for studio or stage. Premium capsules, upgraded electronics, discrete low-noise circuit design and sonically transparent windscreens guarantee unmatched performance when recording critical tracks in the studio. Solid heavy duty body design and rugged shockmounts* ensure unmatched long-term reliability for broadcast or remote recording applications where most studio microphones would fear to venture.

Designed to complement ART's world class line of studio preamps and processors, M-Series microphones are expertly engineered by Applied Research & Technology to deliver the quality and performance professional studios would expect, at a price any home or project studio will embrace.

**M-One package includes heavy-duty hard tail standmount*

M
ONE
