NEWS RELEASE

ART RELEASES NEW DUAL LIMITER

Classic PWM Based Two-Channel Dynamic Compressor

FOR IMMEDIATE RELEASE:

Niagara Falls, NY – Applied Research and Technology, a division of Yorkville Sound, announces the release of the new ART Dual Limiter, a two channel compressor using a pulse wave modulator circuit design.

The ART DUAL LIMITER features a classic design in which a PWM is employed for the gain control, providing clean quiet gain while maintaining incredible transparency. ART has been known for their tube based optical compressors for over 25 years. Developed in partnership with studio and live-sound engineers, the DUAL LIMITER offers a time tested solid state audio circuit with all of the controls that are sought by professionals.

The DUAL LIMITER has two channels of dynamic audio processing paired with a 5 segment LED array to clearly show the amount of gain reduction. It has selectable stereo linking of channel controls with XLR and ¼” inputs and outputs as well as variable attack and release controls.

The DUAL LIMITER is housed in a standard 1u space rack-mountable steel chassis, and is built with high quality components, designed for years of reliable operation in the studio, production facility, or on the road.

###

ABOUT ART - Applied Research and Technology began producing professional audio signal processing equipment in 1984 after former employees of the original MXR Innovations created the company. Since then, it has become one of the world's largest signal processing manufacturers, developing and distributing products for the music industry for nearly 30 years. ART was acquired by Yorkville Sound in late 1999 and has offices in Rochester, New York—Niagara Falls, New York with its corporate parent housed in Pickering Ontario, Canada.

ABOUT YORKVILLE – Yorkville Sound has been a manufacturer of PA systems and loudspeakers, Traynor instrument amplifiers, installed audio systems and accessories since its inception in 1963. The company now employs over 220 people in a 150,000 sq ft facility in Pickering Ontario, Canada (a suburb of Toronto).

In addition to its manufacturing capability, Yorkville Sound is an importer and distributor of microphones, and accessories under the **Apex brand** (www.apxelectronics.com) as well as studio effects, signal processors, microphone preamps and accessories under the brand name **Applied Research & Technology (ART)** (www.artproaudio.com) originally based in Rochester New York. Yorkville Sound distributed lines include **Granite Percussion, Denver Guitars, Orion FX Lighting, Dynaudio PRO** and **Hughes & Kettner** Amplifiers for North America; **Epiphone Guitars, Gibson Guitars, Mapex Drums, Los Cabos Drumsticks, Line 6, Ernie Ball Strings, Rotosound Strings, Dean Markley Strings, Snark Tuners, GoPro Cameras, TrueTone Pedals, Gibson Pro Audio, Cerwin-Vega, Stanton, KRK** as well as **Gallien-Krueger** amplifiers for Canada.
